This **ATTEMPT BURGLARY-OUTBUILDING** took place between **20:00:00** on **FRIDAY 08-JUL-2016** and **09:00:00** on **SATURDAY 09-JUL-2016** at **MANOR LA, WARESLEY, KIDDERMINSTER, WORCESTERSHIRE**

The victim lives in a large detached property on the outskirts of Waresley village. On the far side of the lane are a number of standard residential properties and on the victim's side is a neighbouring farm, belonging to his brother in law, and a fishery. Detached from the house, off the drive, is a brick built garage with roller shutter main doors. However, down the side is a wooden single door with glazing. Between the material times unknown offender(s) has approached the side door and used unknown method/instrument to lever/force the door. The top of the door has moved in enough for the alarm to activate at about 0145 hrs. The victim investigated the alarm but only checked the shutter doors. The side door was damaged but no entry gained. A container at the neighbouring farm had been broken into. Very likely that the container burglary was committed before the garage attempt as the offender(s) would have departed in a hurry at the alarm sounding.
