## CHLOROS ENVIRONMENTAL HOSTS PUBLIC MEETING TO INTRODUCE NEW SITE

Chloros Environmental is hosting a public meeting to discuss the development of its new waste management facility site in Hartlebury, Worcestershire.

The public consultation will take place at Hartlebury Parish Hall on Tuesday 27<sup>th</sup> November and is open to those in the local community seeking more information about how the proposed site on the Hartlebury Trading Estate will operate.

**Richard Hurdle, Company Director of Chloros Environmental**, explained: “The event will provide a great opportunity for the team at Chloros to explain the benefits of the site, such as the creation of significant long term skilled employment opportunities and its contribution to national targets for the recycling and recovery of waste.”

A highly trained team of experienced operatives and chemists will transfer from the firm’s existing site in Cutnall Green and will be joined by new employees trained to the same high standards.

The proposed location has been chosen due to its excellent transport links to the trunk road and motorway networks.

Established in 2009, Chloros provides an essential service in collecting, storing and bulking small - volume difficult -to -handle wastes from a wide range of commercial, industrial and public-sector customers.

The public consultation event will take place from 2.00pm-8.00pm on Tuesday 27<sup>th</sup> November at Hartlebury Parish Hall. [www.hartleburyparishhall.co.uk](http://www.hartleburyparishhall.co.uk)
